

1. Ask the user to enter a message then display it using the different html heading tags (from <h1> to <h6>) using Loops. DO NOT write the header element explicitly in your script!

2. Write a script that takes from the user n values and returns their sum.  
Note: stop receiving values from user when he enters 0.

Use coloring format according to user's choice. The user has to choose either red or green or blue color.
